

## PRESS RELEASE

# AuviTran brings AVB connectivity to Yamaha RIVAGE PM series mixing systems

**Montbonnot, France, Tuesday, February, 3rd, 2026**– French audio networking specialist and equipment manufacturer **AuviTran** announces the development of the **HY-slot I/O card**, a new AVB audio interface designed for **Yamaha RIVAGE PM series mixing systems**. This interface enables full compatibility with AVB standards, expanding connectivity options for high-end live sound, installed sound and immersive sound.

The card will be available by contacting **AuviTran's sales department**, and will offer Yamaha RIVAGE PM users a robust and standards-based AVB solution developed by a long-standing partner of Yamaha.

## HY-slot I/O card: AVB expertise at the heart of RIVAGE PM

Designed specifically for Yamaha's RIVAGE PM ecosystem, the HY-slot I/O interface will provide seamless integration of AVB networks into demanding professional audio workflows. Leveraging AuviTran's expertise in AVB technologies, the card ensures reliable, low-latency audio transport while meeting the expectations of large-scale live productions and complex system architectures.

*"This project is the result of more than twenty years of close collaboration and mutual trust between Yamaha and AuviTran," says Laurence Fornari, Head of Sales for the Digigram Group (AuviTran). "Earning Yamaha's trust to develop an AVB interface for RIVAGE PM is a strong recognition of AuviTran's expertise in audio networking standards and our long-term commitment to interoperability and reliability."*

## A partnership grounded in standards and certification

AuviTran, trusted by Yamaha, develops the HY-slot I/O interface based on a partnership that began in 2004, combining shared technical values and a common vision for professional audio networking.

*"AuviTran has demonstrated a deep understanding of AVB technology and professional audio requirements over many years," explains Keigo Hatano, Yamaha General Manager of Global Marketing and Sales, Professional Solutions Division. "We are glad to provide the AVB option to the RIVAGE PM users through a powerful collaboration for developing an AVB interface that meets the performance and reliability standards expected by RIVAGE PM users worldwide."*

AuviTran's AVB solutions have received the **AVNU Alliance MILAN™ certification**, acknowledging the company's long tradition of excellence and know-how in audio networking.

Capitalizing on this expertise, AuviTran's development ensures strict compliance with professional AVB requirements and interoperability across certified devices. This expertise makes the **audio interface card for the HY-slot** a future-ready solution aligned with open standards and scalable system design.

By integrating AVB compatibility into the RIVAGE PM mixing systems range, Yamaha and AuviTran reaffirm their shared commitment to open networking standards and dependable audio infrastructures for live sound applications. ■

## About AuviTran

For more than 20 years, AuviTran has been a pioneer in Audio Networking Solutions. Our Audio ToolBox suite is the spearhead of our Bridging the gap motto. Our solutions bring interoperability into reality, providing seamless audio network solutions to multiple broadcast infrastructures and live installations worldwide. Our AVB solutions are MILAN™ certified, Dante-compatible and support AES67 standards. AuviTran solutions are available through our network of distributors and at [sales@auvitran.com](mailto:sales@auvitran.com).

## About Yamaha Corporation

Founded in 1887, the Yamaha Group has established itself as a global leader in manufacturing musical instruments and audio products while continuing to engage in various business activities to grow services related to sound and music. Yamaha operates over 60 subsidiaries worldwide, dedicated to serving millions of customers across six continents, focusing on delivering excellence in quality and innovation, prioritizing our sustainability efforts and contributing to people's "well-being".
